

February 23, 2017 night meeting

I will be showing you how to make a NorthWind block, also known as Ocean Waves and as Corn and Beans.

You do not have to have a sewing machine. But it will help if you cut the following triangles so you can practice laying out the block. That's the hardest part.

To make 2 6.5" blocks you will need:

1 light 5" square and 1 dark 5" square cut once on the diagonal – giving you 2 dark and 2 light big triangles.

5 light 2.5" squares and 5 dark 2.5" squares cut once on the diagonal – giving you 10 light and 10 dark little triangles

Each block needs 1 dark and 1 light big triangle and 5 dark and 5 light little triangles.

You can make the block with 2 colors or make it scrappy. Scrappy is really pretty.
